Institutional Customer Showcase

Smart Valve™ — Enterprise & Global Deployments

Global Logistics & Industrial Manufacturing

Amazon — Canada & USA

Full Network Rollout | Distribution & Robotics Sorting Facilities

- National-scale deployment across fulfillment, sortation, and robotics sites
- High-flow, pressure-volatile infrastructure environments
- Standardized deployment following pilot validation
- Key takeaway: Proven at extreme scale in mission-critical, automation-heavy facilities.

Linamar — Canada, USA & Mexico

Global Manufacturing Network Rollout (Underway)

- Automotive and industrial manufacturing campuses
- Multi-country standardization under a single technical framework
- Focus on flow stability and meter accuracy in process water
- Key takeaway: Demonstrates global manufacturability and repeatability.

Food & Beverage / Process Water

Labatt Brewing Company

- Large-scale brewing and bottling operations
- Water as a core production input
- Deployed to stabilize flow and reduce non-revenue water

Key takeaway: Validated in process-critical production environments.

Guinness

- High-volume brewing operations
- Tight tolerances around pressure, flow, and metering accuracy

Key takeaway: Acceptance within globally recognized beverage manufacturing.

Commercial Bakeries Inc

- Industrial baking facilities with cyclical, high-demand water loads
- Focus on consistency and infrastructure protection

Key takeaway: Proven in variable-load food production facilities.

W americanwatersavings.com

Kerry Group — Canada

- Ingredient manufacturing and processing facilities
- Emphasis on operational efficiency and input control

Key takeaway: Deployed within global food ingredient supply chains.

Hospitality & Luxury Mixed-Use

St. Regis Hotel & Residences

- Luxury hotel and residential tower
- High sensitivity to pressure events and guest experience

Key takeaway: Suitable for premium assets with zero tolerance for disruption.

Four Seasons Hotels and Resorts — Global Partnership

- Portfolio-wide engagement across flagship properties
- Institutional validation following pilot and performance review

Key takeaway: Endorsed by one of the world's most risk-averse luxury operators.

Institutional Real Estate Portfolios

Starlight Investments — Full Canada Network Rollout

- Large multi-residential portfolio
- Standardized deployment across assets

Key takeaway: Demonstrates portfolio-level scalability and repeatability.

Akelius — Toronto-Wide Rollout

- Dense urban multi-residential assets
- Focus on infrastructure protection and utility normalization

Key takeaway: Proven in large-scale urban residential portfolios.

Smart Valve™ is not an experimental technology — it is **institutionally adopted, operationally proven, and financially underwriteable at scale**.
